Experience

Software Engineer Man Group 07/2023 - 01/2026

- Led a multi-team initiative to integrate LLM-powered code reviews in Bitbucket used by over 70 repos internally.
- Enabled annual database cost savings of $340K/year by migrating to a horizontally scaled Apache Arrow Flight server handling 1 GB/s.
- Built an event-driven data quality framework on top of Kafka, Ray and Postgres with a front end in React. Adopted by 3 teams and deployed to over 50 datasets.
- Drove initiative to triple datasets onboarding from 50 to 150 datasets per year by moving to a medallion data architecture backed by Iceberg and a low-code custom EL framework.
- Boosted fund chargeback by $110K/year by implementing Snowflake cost monitoring.

Head of Data CC Data 09/2021 - 06/2023

- Reduced Azure cloud storage costs by 50% ($80K/year) through tiering policies, data format optimization, and retention strategies.
- Secured clients worth $80k/year by calculating historical and daily order book metrics on over 100TB of data using NumPy, Docker, and Azure Blob Storage.
- Expanded product range by researching, prototyping, and developing a blockchain data product to store, analyze, and standardize on-chain data.

Science and Engineering Leadership Scheme UK Government 10/2020 - 09/2021

- Managed high-profile scientific advice to the government in the Advisory Council for the Misuse of Drugs writing two 40+ page reports (e.g. Advice on consumer cannabidiol and Barriers to research).
- Facilitated social connection of remote civil servants using a JavaScript application backed by Google Sheets that scaled to four different organisations each with up to 600 users (still used as of 2024).

Researcher and lecturer University of Warwick 09/2015 - 09/2020

- Built a strong research portfolio, winning multiple academic awards, with publications in leading journals such as Advances in Mathematics, Annals of Applied Probability and the Journal of Graph Theory.
- Worked with Centre for Science and Policy (NLP), Heathrow airport (logistics modeling) and Defence Science and Technology Laboratory (AI safety).
- Award-winning teacher with experience in all levels and formats, from lecturing master's level courses to providing one-on-one support for underprivileged A-Level students.

Education

Masters in Computer Science 4.0 GPA (Full) 01-08/2026
Georgia Institute of Technology, Atlanta, USA (Part) 09/2023 - 01/2026

PhD in Mathematics Graph Theory, Group Theory, Algebra 09/2015 - 03/2020
University of Warwick, Coventry, UK

Masters in Mathematics 1st Class Honors (top grade, 91% average) 09/2011 - 07/2015
University of Warwick, Coventry, UK

Skills

Programming Languages: Python, SQL, Typescript, C, LaTeX, Nix.
Tools and Frameworks: Pandas, Numpy, SQLAlchemy, FastAPI, Pydantic, Apache Arrow, Kubernetes, Terraform, Docker, Apache Iceberg, Snowflake, Azure Cloud, ArcticDB, MongoDB, Grafana, Prometheus, OpenTelemetry, Sentry, Kafka, Postgres, Ray, React, NextJS.
Collaboration and productivity: JIRA, Bitbucket, Github, Confluence, Obsidian, Neovim, NixOS.
